

Auto-Blanket Wash Cloth

A complete range of products for the optimal cleaning of printing presses.

Nonwoven washcloths delivering superior cleaning, proven to have the best performance in the industry by the laboratory testing at FOGRA, Policloth products are ideal for the printers that are looking for a superior quality washcloth, able to remove up to 30% more ink than the market leader. Poliwash true savings, come not only from the excellent cleaning performance and competitive prices, but also from the lower consumption of cleaning solution: up to 22% lower than any of the competitive products.

PRODUCTS:

- Policloth: Blue nonwoven washcloth of superior quality. The following claims were proven true by the testing at the FOGRA. 1) combined with high flashpoint cleaning detergents (above 100°), removes 15%

more ink than the market leader; 2) reduces by 15% the average consumption of cleaning detergent versus the market leader.

- Poliwash: White nonwoven washcloth of excellent quality: The following claims were proven true by the testing at the FOGRA. 1) the cleaning performance of Poliwash, tested on different types of ink and solvent, is always at top levels; 2) Poliwash allows an average savings of 22% of liquid detergent versus the market leader.

THE EVOLUTION OF WET WASH CLOTH ROLLS FOR PRESS

Engineered for use in the automatic blanket cleaners that require wet rolls, Poliwet Compact can also be used as a replacement of the dry mini-rolls by disconnecting the solvent dispensing systems. When using Poliwet Compact, the mini-roll is moistened just before being used: our rolls will never run dry; your blankets will be perfectly clean; and you will eliminate polluting solvents in the pressroom, thus ensuring minimum impact on the environment and on the health of your press operator (100% VOC free).

KEY FEATURES OF OUR PROPRIETARY CLEANING SOLUTION: -

Performance: water soluble, designed to remove both UV and conventional inks - Concentrated formulation - Environmentally safe: made from natural vegetable oils, 100% VOC free – this is THE eco-wash! - Safety: its formulation, containing only natural ingredients, and safe to the health of the people

Poliwet Compact

Our unique moistening system, made of a special plastic bag divided into two adjacent sections. One section contains the exact quantity of cleaner that is needed for the ideal wetting of the roll, the other contains the nonwoven mini-roll.

The flow of the cleaner from the first into the second section is obtained by removing the separation clip.

The many advantages of Poliwet Compact are:

- **DURABILITY:** not only does the product have a timeless shelf life, but it also lasts extremely long on press, thanks to the exclusive formula of the detergent
- **EASE OF STORAGE:** there is no special storage requirement and no need for routine rotation to keep the impregnation homogeneous
- **FIT FOR APPLICATIONS THAT DEVELOP HIGH TEMPERATURE IN THE PRESS:** the high flashpoint (above 100C / 210°F) of the cleaning solution makes its use safe even on large heat-set web presses
- **MINIMUM IMPACT ON THE ENVIRONMENT, MAXIMUM SAFETY FOR BOTH OPERATORS AND MINIMUM WEAR ON THE BLANKETS:** the cleaning solution is 100% VOC FREE and it is measured in the amount to guarantee the best cleaning results with the lowest use of cleaner
- **CONVENIENT TO PREPARE:** just remove the separation clip and the detergent will flow and evenly wet the mini-roll in a few minutes
- **MAXIMUM CLEANING POWER** as the preparation is affected right before use:
 - the cloth fully maintains its characteristics as it is not weakened by prolonged contact with a solvent
 - the cleaning solution maintains its chemicals properties as it is isolated from the nonwoven
- **BEST VALUE FOR THE MONEY:** it has the most competitive price in the market.

PACKAGE

- 8 plastic bags containing the cleaning solution and the mini-roll separated by a plastic slip
- Gloves
- 1 instruction leaflet
