

Poliflexplate 1.15

Application:

For in-line spot or flood varnishing (coating) in offset applications using all types of varnishes. Especially effective with pearlescent and metallic varnishes

Advantages:

- Perfect alternative to 4 ply blankets
- Highest tolerance of the set up pressure parameters, it allows to use paper and/or polyester underpacking
- Highest dimensional stability
- Reusable for multiple long runs without registration problems

Thanks to the polyester base

Especially resistant to solvent and mechanical stress

Thickness availability (mm):

1.15 - 1.35 – 1.95
