

## **Poliunder Adhesive 2.10**

### **Application:**

Developed to permanently underpack varnishing plates

### **Advantages:**

- The fabric top layer is designed to reduce the friction that is developed between the plate and the underpacking when the plate is installed and tensioned
- The high compressibility allows for the best coat finish
- Plate changes are made easier

### **Thickness availability (mm):**

1.00 – 1.50 – 2.10
